

PROJECT STUDY AREA - CATARAQUI RIVER TO GANANOQUE

1 Coastal forest and wetland shelter development from lake.

2 Houses on a low plain shoreline.

3 Bedrock islands

4 High bank environments increase resilience to coastal flooding.

5 Bedrock shelf visible in the nearshore

6 Development on low plain shoreline.

7 Sheltered low plain shoreline with dense wetland vegetation in the nearshore.

8 Heavily vegetated, stable bank shoreline.

9 Natural and hardened shorelines.

10 Hardened shorelines .
